

Contraceptive Provision Measures

Technical Documentation: Historical Reports v2.01

It is highly recommended that users download and use the most current version of the SAS Programs for measure calculation, since it uses the latest specification and code tables for the contraceptive provision measures.

Should you wish to reproduce previous reports of contraceptive provision rates, you may download the previous version 2.01 of the SAS Programs and claims code lookup tables. The SAS Programs v2.01 are available in the file:

- contraceptive-measure-progs-v2.01.zip (28 KB)

For data years 2013-2016, the lookup tables are in the file:

- contraceptive-lookup-tables-v2-pre-2017.zip (394 KB)

For data year 2017, the lookup tables are in the file:

- contraceptive-lookup-tables-v2-2017.zip (88 KB)

For data year 2018, the lookup tables are in the file:

- contraceptive-lookup-tables-v2-2018.zip (84 KB)

The master sources for the OPA-defined contraceptive method and condition codes are available in the files named below.

For data years 2013-2016:

- Contraceptive-Code-Lookup-v2-pre-2017.xlsx (159 KB)

For data year 2017:

- Contraceptive-Code-Lookup-v2-2017.xlsx (145 KB)

For data year 2018

- Contraceptive-Code-Lookup-v2-2018.xlsx (140 KB)

These Excel files are for analyst reference only and are not required by the SAS programs.

Please note that v2.01 will no longer receive updates.
